

Issued by JPAC: 13 July 2016

Implementation: To be determined by each Service

Change Notification UK National Blood Services No. 27 - 2016

Osteogenesis Imperfecta

This change applies to the Tissue Donor Selection Guidelines for Live and Deceased Donors only.

This is a new entry.

Osteogenesis Imperfecta

Obligatory

Must not donate

Discretionary

Skin

Accept for split skin allografts only; not suitable for the preparation of acellular dermal allografts

Additional Information

Osteogenesis Imperfecta is a congenital disorder that results in defective connective tissue due to defects in the genes relating to production of Collagen I or other connective tissue proteins. Pathology includes bones that fracture easily, loose joints, poor muscle tone and thin, discoloured sclera.
