

Date of publication: 9 May 2014

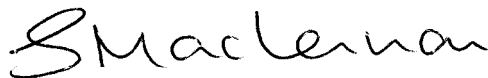

Implementation: To be determined by each Service

Change Notification UK National Blood Services No. 23 - 2014

Osteopenia

Applies to the Whole Blood and Components Donor Selection Guidelines only

Discretionary	If the cause is not of itself a reason to defer, even if on treatment to prevent or treat, accept.
See if Relevant	Disabled Donor Malignancy Steroid Therapy Vitamins and Other Nutritional Supplements
Additional Information	Osteopenia occurs when there is decreased mineralization (mainly lack of calcium) of bone. It can occur for many reasons so it is important to ensure that it is not associated with a condition that would require a potential donor to be deferred.
Reason for Change	A new see if relevant link to Vitamins and other Nutritional Supplements has been added.
