

Guidelines for the Blood Transfusion Services

12.7: Reporting of results

<http://www.transfusionsguidelines.org/red-book/chapter-12-donation-testing-red-cell-immunohaematology/12-7-reporting-of-results>

12.7: Reporting of results

The report must indicate the result of each and every test, by a system that provides positive sample identification.

Reporting a series of tests by an 'assumed negative' procedure is potentially dangerous and not acceptable.

The acceptance and release of test results will be the responsibility of designated personnel of proven proficiency.

Information must be archived.
