

Guidelines for the Blood Transfusion Services

5.3: Haemoglobin screening

<http://www.transfusionguidelines.org/red-book/chapter-5-collection-of-a-blood-or-component-donation/5-3-haemoglobin-screening>

5.3: Haemoglobin screening

A validated haemoglobin screen should be applied to all donors prior to donation. The objective is to ensure that prior to each donation the donor has a minimum acceptable haemoglobin concentration (see section 3.15).
